ARTIST STATEMENT

An Australia born artist, Anne studied fine art in Brisbane, then moved to the USA in 1977. Continuing her studies, she completed her B.A. in Graphics and Studio Arts in 2012. She's captivated by the beauty of the moment: the feeling of a particular pose, a look or a scene. She states: "Life pulls you along and incredible opportunities to express what's going on take hold of you - you have to paint it."

Drawing inspiration and energy from life's pathway, she pours out the experience onto canvas or paper, into sculpture, or experiments with mixed media. "I love arts' ability to inspire, transport and change viewpoints purely from a visual and aesthetic experience." She enjoys the quiet richness of materials she uses for many of her formalism works or delving into areas that push boundaries of challenge.

"I've never tired of finding new ideas or venues and working them through because life is just like that. We struggle, we endure pain and we grow from the learning of this experience. I can't imagine anything better than gaining experience while pouring out my soul and having the opportunity to 'talk' about it directly through my work".
